SUBJECT INDEX TO VOLUME 99

ABDOMEN, Abdominal wound disruption, 41; surgery, Hepatic changes occurring during upper abdominal operations, biopsy studies, 220; upper, diagnosis of disease in, Correlation of liver biopsy findings with surgical disorders of, part of, 331; surgery, Routine use of antibiotics in elective abdominal, 376

Abnormalities and deformities, Congenital, atresia of colon, 34; congenital, Genesis of gastric and certain intestinal diverticula and enterogenous cysts, 135

Abscess, Bacteriologic and clinical study of breast, 368

Adeno-acanthoma, Primary and secondary ovarian, 392

Adenomatosis, Pulmonary, 483

Adenosis, of female breast, 199

Adrenals, cortex, Observation on adrenocortical function in patients undergoing operations upon bones and joints, 1; Histoplasmosis, clinical and pathologic study of 20 cases, 53; Gas insufflation through lumbar and presacral routes, 319

Adrenocorticotropic hormone, Endocrine interrelations concerned with postoperative renal response to water load, 617

American College of Surgeons, Clinical Congress, Preliminary plans for 40th, Convention Hall, Atlantic City, N. J., November 15 to 19, 1954, 126; 254; 382; 505

Ampulla of Vater, Scope of radical surgery in treatment of malignant tumors of extrahepatic biliary tract, 529

Amputation, Comparative study of methods for prevention of, neuroma, 492

Anemia, Splenectomy in children with idiopathic thrombocytopenic purpura, hereditary spherocytosis and Mediterranean, 689

Anesthesia, nerve block, Studies of response of autonomic nervous system following combat injury, 595

Aneurysm, aortic, Use of pliable plastic tubes as, substitutes in man, 287

Anoxia, Process of, death in newborn pups, 5

Antibiotics,—chloramphenicol, chlortetracycline, neomycin, oxytetracycline, penicillin, streptomycin, tetracycline, Influence of, on experimental endogenous peritonitis, 341; Bacteriologic and clinical study of breast abscess, 368; Surgeon's bib, ed. 374; Routine use of, in elective abdominal surgery, 376

Anticoagulants, Control of tromexan therapy, 22

Aorta, Use of pliable plastic tubes as aortic substitutes in man, 287; Valvulotomy for surgical relief of aortic stenosis, 587; Resection of abdominal, with defect replaced by homologous graft, 745

Arteries, Acute vascular trauma in Korean war casualties, analysis of 180 cases, 91; Acute arterial injuries, 129; choroidal, Surgical occlusion of anterior, in parkinsonism, 207; occlusion, Revascularization of arteriosclerotic extremity, ed. 243; hepatic, Pathogenesis of ascites and consideration of its treatment, 385, cor. 782; colic, Surgical significance of regional lymphatic drainage of hepatic flexure, 455; Marginal anastomoses of, to large intestine, 614; Vascular relations of pancreas, 713; graft, Resection of abdominal aorta with defect replaced by homologous, 745; Effect of altering arterial flow on ambulatory venous pressure in postphlebitic extremities, 756

Arteriosclerosis, Revascularization of arteriosclerotic extremity, ed. 243

Arthrodesis, Tibiocalcaneal fusion, surgical technique, 773

Ascites, Pathogenesis of, and consideration of its treatment, 385, cor. 782

Atresia, of colon, Congenital, 34

BILIARY tract, Routine use of antibiotics in elective abdominal surgery, 376; extrahepatic, Scope of radical surgery in treatment of malignant tumors of, 529

Biopsy, Correlation of liver, findings with surgical disorders of upper part of abdomen, 331

Bladder, Management of urinary fistulas in primitive population, 301; Late results of, substitutions with isolated ileal segments, 469

Block, bundle branch, Cardiovascular evaluation in surgery —I, operative risk in cancer patients with, 441

Blood, coagulation, Control of tromexan therapy, 22; studies, Administration of dextran by hypodermoclysis, 147; enzymes, Some factors other than neoplasms altering prostatic fraction of acid phosphatase in serum, 179; circulation, Observations on postoperative, 227; circulation, Revascularization of arteriosclerotic extremity, ed. 243; circulation, Pathogenesis of ascites and consideration of its treatment, 385, cor. 782; circulation, Influence of stasis on bone growth, 413; Comparison of microtechnique and macrotechnique for, volume determinations, 500; Studies of, volume and transfusion therapy in Korean battle casualty, 542; circulation, Experimental study of pulmonary histopathology following positive and negative pressure respirations, 580; deficit, Studies of response of autonomic nervous system following combat injury, 595; plasma, Abnormal, proteolytic activity, diagnosis and treatment, 679; Splenectomy in children with idiopathic thrombocytopenic purpura, hereditary spherocytosis and Mediterranean anemia, 689; circulation, Equilibration time of water (deuterium oxide) following intravenous injection in battle casualty, 703

Blood pressure, hypotension, Administration of dextran by hypodermoclysis, 147; Comparative study of venous valves in limbs, 676; Influence of partial and complete evisceration on action of drugs protecting against lethal hemorrhage, 707; Effect of altering arterial flow on ambulatory venous, in postphlebitic extremities, 756

Blood transfusion, Studies of, volume and, therapy in Korean battle casualty, 542

Bone, surgery, Observations on adrenocortical function in patients undergoing operations upon, and joints, 1; Primary reticulum cell sarcoma of, report of 44 cases, 142; Osteoid osteoma, 193; growth, Influence of stasis on, 413; tumor, Management of malignant disease in neighborhood of hip, 727

Book Shelf, Robert Burns and his heart, 245

Brain, surgery, Effects of intravenous fluids on cerebrospinal fluid pressure, 48; surgery, Surgical occlusion of anterior choroidal artery in parkinsonism, 207

Breast, cancer, Carcinoma of, surgical follow-up study, 9; Radical, operation, 63; Adenosis of female, 199; abscess, Bacteriologic and clinical study of, 368

Burns, Effect of thermal, on wound healing, 74; Infection in,—III, septicemia, common cause of death, 151; Altered response to sodium loading in several severely burned individuals after initial treatment with hypertonic sodium containing fluids, 187; Robert, and his heart, 245

CALCANEUS, Tibiocalcaneal fusion, surgical technique, 773

Cancer, of breast, Carcinoma, surgical follow-up study, 9; Carcinoma of cervix, use of matched pairs of cases to compare treatment by surgery or radiation, 29; of breast, Radical, operation, 63; of thyroid, Surgical

statistics on malignant goiter, 108; metastases, Treatment of secondary tumors of lung, ed. 115; of rectum, Venous invasion in carcinoma, as evidenced by venous radiography, 170; of colon, rectum, Carcinoma, and, 234; Interim report upon "second look" procedure for, of stomach, colon, and rectum and for "limited intraperitoneal carcinosis," 257; Surgeon's classification of carcinoma of stomach, preliminary report, 281; pelvic, Total and anterior, exenteration—I, report of results based upon 315 operations, 324; Primary and secondary ovarian adeno-acanthoma, 392; Distal intramural spread of carcinoma of rectum and rectosigmoid, 421; Diffuse peritonitis secondary to intestinal perforation complicating malignant lesions of colon, 436; Cardiovascular evaluation in surgery—I, operative risk in, patients with bundle branch block, 441; surgery, Late results of bladder substitutions with isolated ileal segments, 469; Pulmonary adenomatosis, 483; of rectum, Continence-preserving procedures in treatment of carcinoma of middle and upper parts, ed. 497; Scope of radical surgery in treatment of malignant tumors of extrahepatic biliary tract, 529; Prognosis in, of uterine cervix based on vaginal smear before treatment, SR sensitization response, 555; Diverticulitis and carcinoma of colon, differential diagnosis, 627; Total gastrectomy for gastric, effect upon mortality, morbidity, and curability, 657; Wishful thinking and, patient, ed. 770

Carcinoma, see Cancer

Cerebrospinal fluid, Effects of intravenous fluids on, pressure, 48

Chemotherapy, Changing status of surgical treatment of tuberculosis, ed. 768

Chilblains, 720

Children, Splenectomy in, with idiopathic thrombocytopenic purpura, hereditary spherocytosis and Mediterranean anemia, 689

Chlorpromazine, Influence of partial and complete evisceration on action of drugs protecting against lethal hemorrhage, 707

Circulation, see Blood, circulation

Classification, Surgeon's, of carcinoma of stomach, preliminary report, 281

Cold, effect, Chilblains, 720

Colitis, Clinical study of two hundred one cases of regional (segmental), 563; Pathology of regional, 572

Colon, Congenital atresia of, 34; Colonic bleeding and diverticular disease of, 101; Carcinoma of, and rectum, 234; Interim report upon "second look" procedure for cancer of stomach, and rectum and for "limited intraperitoneal carcinosis," 257; Diffuse peritonitis secondary to intestinal perforation complicating malignant lesions of, 436; Surgical significance of regional lymphatic drainage of hepatic flexure, 455; Clinical study of two hundred one cases of regional (segmental) colitis, 563; Pathology of regional (segmental) colitis, 572; Diverticulitis and carcinoma of, differential diagnosis, 627

Cysts, enterogenous, Genesis of gastric and certain intestinal diverticula and, 135

DEATH, anoxic, Process of, in newborn pups, 5

Dextran, Administration of, by hypodermoclysis, 147

Diagnosis, differential, Histoplasmosis, clinical and pathologic study of 20 cases, 53; Gas insufflation through lumbar and presacral routes, 319; differential, Diverticulitis and carcinoma of colon, 627

Dibenzyline, Influence of partial and complete evisceration on action of drugs protecting against lethal hemorrhage, 707

Diverticulitis, Colonic bleeding and diverticular disease of colon, 101; and carcinoma of colon, differential diagnosis, 627

Diverticulum, Genesis of gastric and certain intestinal diverticula and enterogenous cysts, 135; of female urethra, problems in diagnosis and treatment, 273

Drugs, Influence of partial and complete evisceration on action of, protecting against lethal hemorrhage, 707

Duodenum, Leakage of duodenal or antral stump complicating gastric resection, 359; ulcer, Technique of subtotal gastrectomy for, (radical distal partial gastrectomy), 647

EDUCATION, surgical, Co-operative training program in surgery between veterans and civilian hospitals, ed. 241

Endocrine glands, interrelations concerned with postoperative renal response to water load, 617

Enema, barium, Reduction of intussusception by, 431

Enzyme, plasmin, Abnormal plasma proteolytic activity, diagnosis and treatment, 679

Epithelium, Relation of pregnancy to abnormalities of cervical, 401

Equilibration time, of water (deuterium oxide) following intravenous injection in battle casualty, 703

Erysipelas, Behavior of local foci causing recurrent streptococcal infections of skin, subcutaneous tissues, and lymphatics, 268

Esophagus, Morphologic and physiologic studies on gastric remnant following resection of esophagogastric junction and esophagojejunostomy, 310

Evisceration, Influence of partial and complete, on action of drugs protecting against lethal hemorrhage, 707

Exenteration, pelvic, Total and anterior,—I, report of results based upon 315 operations, 324

Extrahepatic ducts, Scope of radical surgery in treatment of malignant tumors of, biliary tract, 529

Extremities, Revascularization of arteriosclerotic, ed. 243; paralysis, Venous occlusion of lower, in paraplegic patients, 451; Chilblains, 720; Varicose vein surgery in management of postphlebitic limb, 733; blood supply, Effect of altering arterial flow on ambulatory venous pressure in postphlebitic, 756

FALLOPIAN tube, Observations on interstitial portion of, 159; Simplified, inexpensive technique in hysterosalpingography, 642

Fistula, Management of urinary, in primitive population, 301

Fluids, intravenous, Effects of, on cerebrospinal fluid pressure, 48; imbalance, Infection in burns—III, septicemia, a common cause of death, 151; Altered response to sodium loading in several severely burned individuals after initial treatment with hypertonic sodium containing, 187

Fossa, supravesical, Hernias of, presenting externally through conjoined tendon, 295

Fractures, Problem of fractured hip, ed. 638

GALLBLADDER, Scope of radical surgery in treatment of malignant tumors of extrahepatic biliary tract, 529

Gas insufflation, through lumbar and presacral routes, 319

Gastrectomy, Technique of subtotal, for duodenal ulcer (radical distal partial), 647; Total, for cancer of stomach, effect upon mortality, morbidity, and curability, 657

Gastrointestinal tract, Routine use of antibiotics in elective abdominal surgery, 376

Goiter, Surgical statistics on malignant, 108

Grafts, aorta, Use of pliable plastic tubes as, substitutes in man, 287; Resection of abdominal aorta with defect replaced by homologous, 745

HEART, block, Cardiovascular evaluation in surgery—I, operative risk in cancer patients with bundle branch, 441; valves, Valvulotomy for surgical relief of aortic stenosis, 587
Hemipelvectomy, Management of malignant disease in neighborhood of hip, 727
Hemorrhage, Colonic bleeding and diverticular disease of colon, 101; Studies of blood volume and transfusion therapy in Korean battle casualty, 542; Abnormal plasma proteolytic activity, diagnosis and treatment, 679; Influence of partial and complete evisceration on action of drugs protecting against lethal, 707
Hepatic flexure, Surgical significance of regional lymphatic drainage of, 455
Hermaphrodites, Interim note on application of skin biopsy test of chromosomal sex to, 184
Hernia, inguinal, of supravesical fossa presenting externally through the conjoined tendon, 295
Hip, Problem of fractured, ed. 638; Management of malignant disease in neighborhood of, 727
Histopathology, Experimental study of pulmonary, following positive and negative pressure respirations, 580
Histoplasmosis, clinical and pathologic study of 20 cases, 53
Hospitals, civilian, Veterans Administration, Co-operative training program in surgery between, and, ed. 241
Hyaluronidase, Administration of dextran by hypodermoclysis, 147
Hyperplasia, basal cell, Relation of pregnancy to abnormalities of cervical epithelium, 401
Hypodermoclysis, Administration of dextran by, 147
Hysterectomy, vaginal, Indications, advantages, and surgical technique of, 761
Hysterosalpingography, Simplified, inexpensive technique in, 642

ILEUM, Late results of bladder substitutions with isolated ileal segments, 469
Infants, Congenital atresia of colon, 34
Infection, in burns—III, septicemia, common cause of death, 151; Behavior of local foci causing recurrent streptococcal, of skin, subcutaneous tissues, and lymphatics, 268
Injection, intravenous, Equilibration time of water (deuterium oxide) following, in battle casualty, 703
Instruments and apparatus, Sterile scalpel, 118; fluoroscopic screen, Simplified, inexpensive technique in hysterosalpingography, 642; Myers intraluminal stripper, Varicose vein surgery in postphlebitic limb, 733
Insufflation, perirenal, Gas, through lumbar and presacral routes, 319
Intestines, Colonic bleeding and diverticular disease of colon, 101; Genesis of gastric and certain intestinal diverticula and enterogenous cysts, 135; Preparation of patient for intestinal surgery, ed. 373; Reduction of intussusception by barium enema, 431; Diffuse peritonitis secondary to intestinal perforation complicating malignant lesions of colon, 436; Clinical study of 201 cases of regional colitis, 563; Pathology of regional colitis, 572; Marginal anastomoses of arteries to large, 614
Intussusception, Reduction of, by barium enema, 431

JEJUNUM, Morphologic and physiologic studies on gastric remnant following resection of esophagogastric junction and esophagojejunostomy, 310
Joints, surgery, Observations on adrenocortical function in patients undergoing operations upon bones and, 1

KIDNEY, Gas insufflation through lumbar and presacral routes, 319; Endocrine interrelations concerned with postoperative renal response to water load, 617

LEG, Comparative study of venous valves in limbs, 676; postphlebitic, Varicose vein surgery in management of, limb, 733; postphlebitic, Effect of altering arterial flow on ambulatory venous pressure in, extremities, 756
Liver, Hepatic changes occurring during upper abdominal operations, biopsy studies, 220; Correlation of, biopsy findings with surgical disorders of upper part of abdomen, 331; Pathogenesis of ascites and consideration of its treatment, 385, cor. 782
Lung, Histoplasmosis, clinical and pathologic study of 20 cases, 53; Treatment of secondary tumors of, ed. 115; Pulmonary adenomatosis, 483; Experimental study of pulmonary histopathology following positive and negative pressure respirations, 580; Changing status of surgical treatment of tuberculosis, ed. 768
Lymphatic system, Surgical significance of regional, drainage of hepatic flexure, 455; Behavior of local foci causing recurrent streptococcal infections of skin, subcutaneous tissues, and, 268

METABOLISM, Endocrine interrelations concerned with postoperative renal response to water load, 617

NECROSIS, pancreatic, Experimental studies concerning factors in pathogenesis of acute pancreatitis, 83
Nervous system, autonomic, Studies of response of, following combat injury, 595
Neuroma, Comparative study of methods for prevention of amputation, 492
Newborn, Process of anoxic death in, pups, 5

OBSTETRICS, Clinical applications of, radiology, 462; Method of repair of postpartal lacerations of cervix uteri, 776
Osteoid osteoma, 193
Ovary, Primary and secondary ovarian adeno-acanthoma, 392

PANCREAS, Experimental studies concerning factors in pathogenesis of acute pancreatitis, 83; Vascular relations of, 713
Pancreatitis, Experimental studies concerning factors in pathogenesis of acute, 83
Paraplegia, Venous occlusion of lower extremities in, patients, 451
Parkinsonism, Surgical occlusion of anterior choroidal artery in, 207
Pathology, of regional (segmental) colitis, 572
Pelvis, Total and anterior pelvic exenteration—I, report of results based upon 315 operations, 324; exenteration, Late results of bladder substitutions with isolated ileal segments, 469
Peritoneum, Interim report upon "second look" procedure for cancer of stomach, colon, and rectum and for "limited intraperitoneal carcinosis," 257
Peritonitis, Influence of antibiotics on experimental endogenous, 341; Diffuse, secondary to intestinal perforation complicating malignant lesions of colon, 436
Plasma proteolytic activity, Abnormal, diagnosis and treatment, 679
Plasma volume, determinations, Comparison of microtechnique and macrotechnique for blood, 500
Posture, Comparative study of venous valves in limbs, 676
Pregnancy, Relation of, to abnormalities of cervical epithelium, 401; Clinical applications of obstetric radiology, 462

Prostate, Some factors other than neoplasms altering the prostatic fraction of acid phosphatase in serum, 179
Prothrombin, Control of tromexan therapy, 22
Pulse, volume, Studies of response of autonomic nervous system following combat injury, 595
Purpura, Splenectomy in children with idiopathic thrombocytopenic, hereditary spherocytosis and Mediterranean anemia, 689
Pylorus, Leakage of duodenal or antral stump complicating gastric resection, 359

RADIOTHERAPY, Carcinoma of cervix, use of matched pairs of cases to compare treatment by surgery or radiation, 29; Prognosis in cancer of uterine cervix based on vaginal smear before treatment, SR—sensitization response, 555; Wishful thinking and cancer patient, ed. 770
Rectum, Venous invasion in carcinoma of, as evidenced by venous radiography, 170; Carcinoma of colon and, 234; Interim report upon "second look" procedure for cancer of stomach, colon, and, and for "limited intraperitoneal carcinosis," 257; Management of urinary fistulas in primitive population, 301; Distal intramural spread of carcinoma of, and rectosigmoid, 421; Continence-preserving procedures in treatment of carcinoma of middle and upper parts of, ed. 497
Respiration, Experimental study of pulmonary histopathology following positive and negative pressure, 580
Resuscitation, Process of anoxic death in newborn pups, 5
Reticulo-endothelial system, Histoplasmosis, clinical and pathologic study of 20 cases, 53
Roentgenography, Venous invasion in carcinoma of rectum as evidenced by venous radiography, 170; Gas insufflation through lumbar and presacral routes, 319; Clinical applications of obstetric radiology, 462

SARCOMA, Primary reticulum cell, of bone, report of 44 cases, 142; Management of malignant disease in neighborhood of hip, 727
Scalpel, Sterile, 118
Sensitization response (SR), Prognosis in cancer of uterine cervix based on vaginal smear before treatment, 555
Septicemia, Infection in burns—III, common cause of death, 151
Serum acid phosphatase, Some factors other than neoplasms altering prostatic fraction of, in, 179
Sex, Interim note on application of skin biopsy test of chromosomal, to hermaphrodites, 184
Sigmoid, Distal intramural spread of carcinoma of rectum and rectosigmoid, 421
Skin, biopsy test, Interim note on application of, of chromosomal sex to hermaphrodites, 184; Behavior of local foci causing recurrent streptococcal infections of, subcutaneous tissues, and lymphatics, 268; temperature, Studies of response of autonomic nervous system following combat injury, 595; Chilblains, 720
Sodium chloride, Altered response to, loading in several severely burned individuals after initial treatment with hypertonic, containing fluids, 187
Spherocytosis, Splenectomy in children with idiopathic thrombocytopenic purpura, hereditary, and Mediterranean anemia, 689
Spleen, Splenectomy in children with idiopathic thrombocytopenic purpura, hereditary spherocytosis and Mediterranean anemia, 689
Splenectomy, in children with idiopathic thrombocytopenic purpura, hereditary spherocytosis and Mediterranean anemia, 689
Spinal cord, injuries, Venous occlusion of lower extremities in paraplegic patients, 451
Starch powder, Comparison of talc and absorbable, 277
Stasis, Influence of, on bone growth, 413
Stenosis, Valvulotomy for surgical relief of aortic, 587
Stomach, accessory, Genesis of gastric and certain intestinal diverticula and enterogenous cysts, 135; Interim report upon "second look" procedure for cancer of, colon, and rectum and for "limited intraperitoneal carcinosis," 257; Surgeon's classification of carcinoma of, preliminary report, 281; Morphologic and physiologic studies on gastric remnant following resection of esophagogastric junction and esophagojejunostomy, 310; Leakage of duodenal or antral stump complicating gastric resection, 359; Technique of subtotal gastrectomy for duodenal ulcer (radical distal partial gastrectomy), 647; Total gastrectomy for gastric cancer, effect upon mortality, morbidity, and curability, 657
Streptococcus, infections, Behavior of local foci causing recurrent streptococcal, of skin, subcutaneous tissues and lymphatics, 268
Surgeon, training of, bib, ed. 374
Surgeon at work, Sterile scalpel, 118; Routine use of antibiotics in elective abdominal surgery, 376; Comparison of microtechnique and macrotechnique for blood volume determinations, 500; Simplified, inexpensive technique in hysterosalpingography, 642; Technique of subtotal gastrectomy for duodenal ulcer (radical distal partial gastrectomy), 647; Tibiocalcaneal fusion, surgical technique, 773; Method of repair of postpartal lacerations of cervix uteri, 776
Surgery, Observations on adrenocortical function in patients undergoing operations upon bones and joints, 1; Carcinoma of cervix, use of matched pairs of cases to compare treatment by, or radiation, 29; Abdominal wound disruption, 41; technique, Radical breast operation, 63; Acute vascular trauma in Korean war casualties, analysis of 180 cases, 91; Sterile scalpel, 118; Acute arterial injuries, 129; Hepatic changes occurring during upper abdominal operations, biopsy studies, 220; postoperative complications, Observations on, circulation, 227; technique, Interim report upon "second look" procedure for cancer of stomach, colon, and rectum and for "limited intraperitoneal carcinosis," 257; postoperative complications, Comparison of talc and absorbable starch powders, 277; graduate training, Co-operative training program in, between veterans and civilian hospitals, ed. 241; postoperative complications, Morphologic and physiologic studies on gastric remnant following resection of esophagogastric junction and esophagojejunostomy, 310; radical, Total and anterior pelvic exenteration—I, report of results based upon 315 operations, 324; postoperative complications, Influence of antibiotics on experimental endogenous peritonitis, 341; complications, Leakage of duodenal or antral stump complicating gastric resection, 359; preoperative care, Preparation of patient for intestinal, ed. 373; technique, Surgeon's bib, ed. 374; preoperative care, Routine use of antibiotics in elective abdominal, 376; risks, Cardiovascular evaluation in,—I, operative, in cancer patients with bundle branch block, 441; right hemicolectomy, Surgical significance of regional lymphatic drainage of hepatic flexure, 455; technique, Late results of bladder substitutions with isolated ileal segments, 469; technique, Comparative study of methods for prevention of amputation neuroma, 492; technique, Continence-preserving procedures in treatment of carcinoma of middle and upper parts of rectum, ed. 497; radical, Scope of, in treatment of malignant tumors of extrahepatic biliary tract, 529; war, Studies of blood volume and transfusion therapy in

Korean battle casualty, 542; technique, Valvulotomy for surgical relief of aortic stenosis, 587; technique, Badenock's procedure, Reconstruction of posterior portion of urethra, 634; Technique, of subtotal gastrectomy for duodenal ulcer (radical distal partial gastrectomy), 647; technique, Total gastrectomy for gastric cancer, effect upon mortality, morbidity, and curability, 657; preoperative care, Influence of partial and complete evisceration on action of drugs protecting against lethal hemorrhage, 707; technique, Varicose vein, in management of postphlebitic limb, 733; technique, Resection of abdominal aorta with defect replaced by homologous graft, 745; technique, Indications, advantages, and surgical, of vaginal hysterectomy, 761; Changing status of surgical treatment of tuberculosis, ed. 768; cancer, Wishful thinking and, patient, ed. 770; technique, Tibiocalcaneal fusion, surgical, 773; technique, Method of repair of postpartal lacerations of cervix uteri, 776

TALC, Comparison of, and absorbable starch powders, 277
Tendon, conjoined, Hernias of supravesical fossa presenting externally through, 295
Test, skin biopsy, Interim note on application of, of chromosomal sex to hermaphrodites, 184
Thyroid, tumor, Surgical statistics on malignant goiter, 108
Tibia, Tibiocalcaneal fusion, surgical technique, 773
Tissue, subcutaneous, Behavior of local foci causing recurrent streptococcal infections of skin, and lymphatics, 268; reaction, Comparison of talc and absorbable starch powders, 277
Trauma, Acute vascular, in Korean war casualties, analysis of 180 cases, 91; Acute arterial injuries, 129; Equilibration time of water (deuterium oxide) following intravenous injection in battle casualty, 703
Tromexan, Control of, therapy, 22
Tuberculosis, pulmonary, Changing status of surgical treatment of, ed. 768
Tubes, plastic, Use of pliable, as aortic substitutes in man, 287
Tumors, of lung, Treatment of secondary, ed. 115; Osteoid osteoma, 193

ULCER, duodenal, Technique of subtotal gastrectomy for, (radical distal partial gastrectomy), 647
Urethra, Diverticulum of female, problems in diagnosis and treatment, 273; Management of urinary fistulas in primitive population, 301; Reconstruction of posterior portion of, 634
Uterus, Observations on interstitial portion of fallopian tube, 159; Simplified, inexpensive technique in hysterosalpingography, 642; Indications, advantages, and surgical technique of vaginal hysterectomy, 761
Uterus cervix, Carcinoma of, use of matched pairs of cases to compare treatment by surgery or radiation, 29; Relation of pregnancy to abnormalities of cervical epithelium, 401; Prognosis in cancer of, based on vaginal smear before treatment, SR—sensitization response, 555; Method of repair of postpartal lacerations of, 776

VAGINA, Management of urinary fistulas in primitive population, 301; Prognosis in cancer of uterine cervix based on vaginal smear before treatment, SR—sensitization response, 555
Valves, venous, Comparative study of, in limbs, 676
Valvulotomy, for surgical relief of aortic stenosis, 587
Varicose veins, surgery in management of postphlebitic limb, 733
Veins, Acute vascular trauma in Korean war casualties, analysis of 180 cases, 91; roentgenography, Venous invasion in carcinoma of rectum as evidenced by venous radiography, 170; hepatic, portal, Pathogenesis of ascites and consideration of its treatment, 385, cor. 782; occlusion, Venous, of lower extremities in paraplegic patients, 451; Comparative study of venous valves in limbs, 676; saphenous, Varicose, surgery in management of postphlebitic limb, 733; pressure, Effect of altering arterial flow on ambulatory venous, in postphlebitic extremities, 756

WAR, Acute vascular trauma in Korean, casualties, analysis of 180 cases, 91; surgery, Acute arterial injuries, 129; surgery, Studies of blood volume and transfusion therapy in Korean battle casualty, 542; wounds, Studies of response of autonomic nervous system following combat injury, 595
Water, Endocrine interrelations concerned with postoperative renal response to, load, 617; balance, Equilibration time of, (deuterium oxide) following intravenous injection in battle casualty, 703
Wounds, Abdominal, disruption, 41; healing, Effect of thermal burns on, 74; Acute vascular trauma in Korean war casualties, analysis of 180 cases, 91; Acute arterial injuries, 129; burn, Infection in,—III, septicemia, common cause of death, 151; war, Studies of blood volume and transfusion therapy in Korean battle casualty, 542; war, Studies of response of autonomic nervous system after combat injury, 595
